

March 24, 2020 JSHP's dry type **110kV/35kV 40MVA** transformer puts in operation at a data center in Shanghai.

The unit rates **110kV/35kV 40MVA@AN cooling**, HV OLTC  $\pm 4 \times 1.25\%$  plus HV DETC  $\pm 2 \times 2.5\%$ , insulation level: Um126kV/**LI480kV**/AC200kV. With this record breaking dry type transformer, the datacenter avoids to use the SF6 unit in Shanghai city.

At the JSHP factory and the test lab. The type test includes the short circuit withstanding test.

JSHP is the largest medium transformer manufacturer in the world.
